THE SEXICAN

The Sexican invites to a mad sonic melting pot of ethnic and modern influences. The musical offspring is World Rock with elements of Mariachi, Gypsy and Balkan tonality. A Global fusion served with an energy that is truly contagious.

The bands' songwriter and frontman Mike Hecchi says about the bands inspiration that it can be - 'anything from Cuban Folk to Hungarian Polka' and that 'any element and genre is used as long as it seems to underline the message of the songs...' The lyrics are sharp and often with critical views on modern society and the lack of international community, while there's room for celebration and the 'joie de vivre' - joy of life.

The latter is especially noticeable at their reknowned and explosive live-shows. It is no coincidence that 'energy' is a word repeated through every single live review written on the band in its mere eight years of existence. They are known for their infectious energy on stage, inducing spontaneous chain dances among audiences. The wide spread demand for The Sexican as a superb and righteously sought-after live act for venues and festivals is continuously increasing with several major international festivals on the tour roster. This with recent live performances on major TV networks in Sweden, Finland, Germany and Mexico to boost.

A tour documentary will air in 2017 along with a live album. The Sexican will be touring Scandinavia, Western Africa, Mexico and Europe on their Last Stand Tour.
